1) Claims 1 to 4, 9 to 14, 19 to 24, 27, 28 and 30 to 40 are pending in the instant application. Claims 1 to 4, 9, 13, 19 to 24, 27, 28, 30 to 32 and 35 have been amended, claims 5 to 8, 15 to 18, 25 and 26 have been canceled and claims 37 to 40 have been added as requested by Applicant in the correspondence filed 29 March of 2004.

2) Any objection or rejection of record that is not expressly repeated in this action has been overcome by Applicant's response and withdrawn.

3) The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4) Claims 1 to 4, 9 to 14, 19 to 24, 27, 28 and 30 to 40 are allowable as written.

5) Claims 19 and 20 stand objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim for those reasons of record. Each of these claims can be infringed by a polynucleotide that does not infringe at least one of the claims from which they multiply depend. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

6) Claims 13 and 14 are rejected under 35 U.S.C. 112, first and second paragraph, as not being enabled and as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims are vague and indefinite because there is no antecedent basis for "a VDR or VDR isoform polypeptide". These claims are incomplete and, therefore, not enabled

because they do not require an isolated polynucleotide encoding the “VDR or VDR isoform polypeptide” that is produced by the claimed method. The instant specification does not provide the guidance needed to produce a specific protein by culturing a transformed cell lacking a polynucleotide encoding that protein. Neither claim 1 nor any of the intervening claims from which claims 13 and 14 depend are limited to an isolated polynucleotide encoding a “VDR or VDR isoform polypeptide”.

7) Claims 19 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims are vague and indefinite because there is no antecedent basis for “the nucleotide sequence of any one of claims 21 –24 or 28”, which are each drawn to “an isolated polynucleotide molecule”.

8) Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
